Objective

Full stack developer and a former Deputy Sheriff with experience and passion in front and back end development. A deep knowledge in Java Script, HTML, CSS, MySQL, MongoDb, IndexDb, PWA, Node.js, REACT, Bootstrap and Bulma Framework. Adept at taking challenges and solving problems with demonstrated leadership trough team building and people skills. Highly trained to produce results in stressful situations and take necessary actions required to complete tasks. My passion is to create something that people interact with, use, touch and love in their daily life through coding and building new technologies.

Projects

UCF Coding Bootcamp Project (Employee Tracker): Designed and built an application through Node.js. Utilized npm (MySQL, Inquirer.js, Console-Table-Printer and Asciiart-Logo. A prompt-based node application that helps the User create his/her own employee database dynamically via JS in MySQL. The application contains full CRUD by which new departments, roles and employees can be created updated and deleted based on the selected choices in the prompts provided.

UCF Coding Bootcamp Project (Note Taker): Designed and built an application utilizing Express.js. Full Crud application that allows User to save update and delete notes. The application was built with Express.js, JS, JQuery, CSS3 and HTML5.

UCF Coding BootCamp Project (The HUB): As a Project Manager, designed and built full CRUD MERN application with my Team. An application where Admin and the Users can mutually benefit from by optimizing efficiency and time management. The application provides access to a different dashboard given the position of the Users. In the dashboard the Users will be able to see goals(long-term/short-term) that the Admin has listed within the team. The next page is a planner page where users will see a calendar and a personal weekly planner. The final page was created to enhance communication. All Users within the team can search each other's weekly planners and keep updated amongst each other. Technologies: Bootstrap, Mongoose ORM, Express.js, REACT, Node.js, PassPort.js and Axios.

Professional Experience

UCF Coding Boot Camp, Orlando, FL ∎ *Project Manager* ∎ March 2020 – May 2020
- Develop and oversee all three main projects that were tasked by the Boot Camp.
- Assign tasks needed to complete projects by due date.
- Maintain Team balance during production and development.
